

ACTIVE ATTIC VENTILATOR

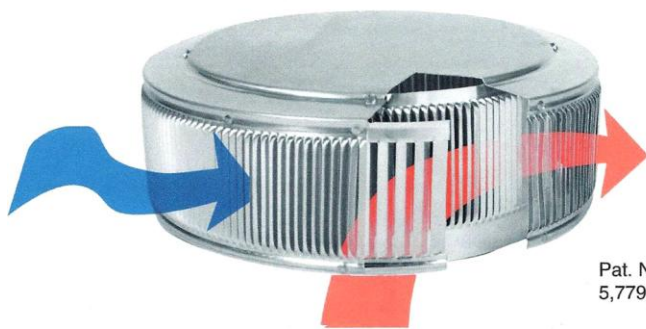

A Roof Vent That Exhausts Air Like A Turbine, With No Moving Parts!

The Active Attic Ventilator is a roof vent which effectively draws air out from the attic by means of winds propulsion through louvers, causing suction out of the vent.

This suction effect exhausts heat in the summer and moisture in the winter from your attic area, promoting a safer, healthier, and more energy efficient home!

The Active Attic Ventilator is a **GREEN** product, which can allow for an **Energy Savings Up to 25%!**
